Get smart! Toys for your kids

Other challenging new board games this season include [Platypus Games' Evolution](#) and [Cogno Deep Worlds](#) from DoubleStar, LLC. Evolution has little to do with Darwin's theory but challenges teams of players or "tribes" to take on increasingly difficult tasks on the game's evolutionary ladder.

Recommended for teens to adults, the game retails for \$34.95. Priced at \$29.95, Cogno Deep Worlds takes players, ages 7 and up, on a race across an ocean on another planet.
