New & Notable Toys: Games

Codebreaker by DOUBLESTAR LLC

New from the makers of the award-winning Cogno board games, Codebreaker is built around the idea that players don't really want other players to know what they're thinking. The game begins with 17 pairs of tiles that feature the engaging characters from the Cogno games and books series. The object is to find as many matched pairs as possible – while preventing other players from finding them first.

In Codebreaker, players use the included dry erase markers to draw or write something on the backs of the cards they pick. Players delve into their lifetime of memories to create “codes” that help them remember where the game's characters are hiding. The codes can be words, pictures, famous quotations or numbers. The key is creating codes that others won't guess ... and the fun is guessing others' codes. Special rules may force players to reveal their codes, allow sneak peeks at their characters or swipe a pair of cards from someone else. (Price: \$19.95; Age: 7 and up)
